# Management Centralized

## Painel de Clientes

Our interface was designed to reduce cognitive load, offering a clear view of each account's status in real time.

With dynamic filters and quick "Edit" and "Delete" actions, the administrator maintains complete control without switching contexts.

# Impact on Productivity

- We currently manage 1,248 clients with a solid base of 1,180 active accounts.
- These numbers reflect the system's efficiency in keeping the user base engaged and the very low data churn rate within the platform.

# Indicators of Success

**1,180 active  
accounts**

**94.6%  
Retention  
Rate**

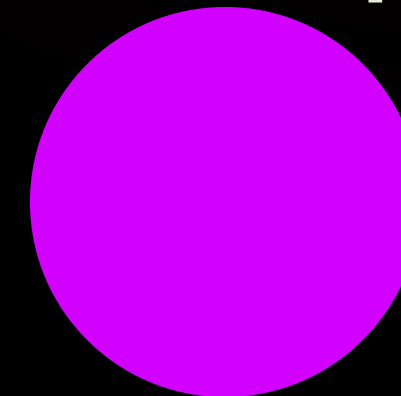

**1,248  
clients**

# Engineering Interface

Accessibility and user experience — UX.

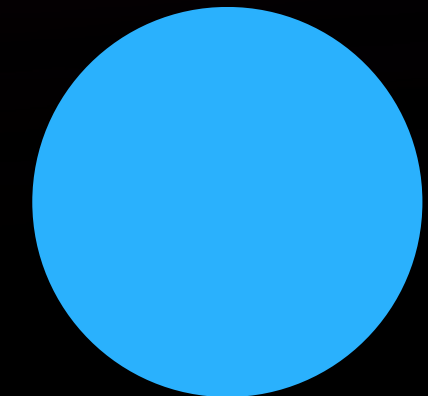

- 1. Visual fatigue.
- 2. Cognitive Stress
- 3. For users with low vision or some type of color blindness.

# Architecture Technological

## Frontend

Developed in React + Tailwind CSS to ensure speed, responsiveness, and a modern aesthetic.

## Backend:

Based on Node.js with a MySQL database hosted on Render, ensuring data integrity and scalability.
